ADVISORY ACTION

☒ THE PERIOD FOR RESPONSE:

- a) ☒ is extended to run _____ or continues to run THREE MONTHS from the date of the final rejection
- b) ☐ expires three months from the date of the final rejection or as of the mailing date of this Advisory Action, whichever is later. In no event however, will the statutory period for the response expire later than six months from the date of the final rejection.

Any extension of time must be obtained by filing a petition under 37 CFR 1.136(a), the proposed response and the appropriate fee. The date on which the response, the petition, and the fee have been filed is the date of the response and also the date for the purposes of determining the period of extension and the corresponding amount of the fee. Any extension fee pursuant to 37 CFR 1.17 will be calculated from the date of the originally set shortened statutory period for response or as set forth in b) above.

☐ Appellant's Brief is due in accordance with 37 CFR 1.192(a).

☒ Applicant's response to the final rejection, filed 13 DEC 2000 has been considered with the following effect, but it is not deemed to place the application in condition for allowance:

NOTE: _____

2. ☐ Newly proposed or amended claims _____ would be allowed if submitted in a separately filed amendment cancelling the non-allowable claims.
3. ☐ Upon the filing an appeal, the proposed amendment ☐ will be entered ☐ will not be entered and the status of the claims will be as follows:

Claims allowed: _____

Claims objected to: _____

Claims rejected: _____

However;

☐ Applicant's response has overcome the following rejection(s): _____

4. ☒ The ~~affidavit~~ request for reconsideration has been considered but does not overcome the rejection because contrary to response (p.2), page 3 of specification does not specify "another" dielectric other than grown or CVD silicon dioxide which are both silicon dioxide rather than "dielectric" dielectric materials. Contrary to response (p.3-4), applicant's
5. ☐ The affidavit or exhibit will not be considered because applicant has not shown good and sufficient reasons why it was not earlier presented. Difficulty lies in the breadth of the claims which do not distinguish over subregions of dielectric isolation regions and subregion of a substrate (as indicated "region") in the references. All the references do have an isolation trench master as claimed.
- ☐ The proposed drawing correction ☐ has ☐ has not been approved by the examiner.
- ☐ Other
